Global Positioning System

The on-board GPS option locates boreholes simply, fast and accurately. Its easy-to-read 'where-to-go' on-screen directions save time especially for technicians on different sites, consultant audits of unfamiliar borehole locations or training new staff.

Benefits

- Saves time
- Ease of operation
- Improved efficiency
- Reduced operating costs
- Auditable record
- Upgrade existing analysers

Applications / Other

- Landfill and Brownfield
- Training new staff

Features

- Real time GPS tracking and location
- Large crystal clear display screen
- Compatible with GAM
- Upload Bore-hole locations (1000)
- On-site store locations
- Ability to show locations on Google Earth, Google Maps, etc.
- GPS location of borehole stored with readings
