

Gas Extraction Pipework  
Perimeter Boreholes  
Landfill Gas

## Gas Flow Measurement Options

### Anemometer - High gas flow indicator

- GA2000 and GEM2000 range
- Plug in connection
- Flow can be set up in m/s or m<sup>3</sup>/h
- 11mm diameter head
- Flow up to 40m/sec
- Operating temperature up to 80°C
- Use on gas extraction systems

### Internal Low Flow

- Specify at time of manufacture
- Only on new GA2000 Plus/ GA2000
- 0 - 20 litres/ hour
- Borehole low flow monitoring
- Use on perimeter boreholes

### Pitot Tube - Gas Flow

- Only use with GEM2000/ GEM2000 Plus
- Pressure readings taken in mbar
- High gas flow calculated on analyser m<sup>3</sup>/h
- Use on gas extraction systems
